

# **SKIRE** CAPITAL PROGRAM AND PROJECT MANAGEMENT SOLUTIONS

## Enhance and Adapt Successful Processes

Skire solutions are the only Capital Program and Project Management Solutions that map to your existing business processes and deliver the flexibility for adapting them as your needs change. You can easily create new processes and improve project management consistency across your organization. Like other Skire customers, you'll soon experience significant time savings, higher-quality project data, and measurable reductions in change orders, claims, and cost overruns.

## Control Costs Closely

Up-to-the-minute visibility into costs, expenditures, and funding allocations lets you make accurate, cost-effective decisions—earlier. Now you can quickly retrieve active project cost data in a consistent format. Accurately determine the true cost of building certain types of structures. Quickly identify situations that would normally result in change orders. And substantiate actual costs to minimize claims.

## Gain a Unified View

Skire solutions are Internet-based, so everyone on your project team can quickly and easily find the information they need, from wherever they are working. Your facilities managers, project managers, and finance employees will save hours of time and effort in locating documents and data. External partners, such as architects and contractors, can easily submit payment applications, share drawings, and provide consistent status information. With a unified view of all project data, Skire makes it easier for everyone to work together.

## Reduce Risk with Executive Visibility

Broad project management perspective and the ability to drill down into underlying details help you make important decisions with better insight. You'll gain at-a-glance visibility into active projects through reporting dashboards. You can quickly retrieve current, specific data in seconds to minimize project risk and identify potential issues before they disrupt budgets or schedules. Skire improves decision-making with immediate, centralized access to critical project information.

### The Platform for Integrated Management

Unifier™ is a powerful business process automation platform for Capital Program and Project Management.

- |                            |                          |
